

SpeedZ - Automobile Accessories and Spare Parts Shopping platform

INTRODUCTION

Speedz is an automobile accessories and spare parts shop that provides high-quality products for various types of vehicles. The purpose of this Requirement Analysis Document is to define the requirements for the Speedz Automobile Accessories and Spare Parts Management System. The system is designed to automate the daily operations of the shop, including customer management, product management, inventory control, supplier management, billing, sales, and report generation. It reduces manual work, improves data accuracy, and enables efficient business management.

OBJECTIVES

- Provide a user-friendly system for managing Speedz shop operations.
- Maintain records of customers, automobile accessories, spare parts, suppliers, employees, and sales.
- Monitor inventory and stock availability.
- Generate bills, invoices, and sales reports.
- Improve business efficiency by reducing manual paperwork.
- Support better decision-making through accurate reports.

Major Activities in the System

A. Customer Management

- Register new customers.

- Update customer details.
- Search customer records.
- View customer purchase history.

B. Product Management

The shop sells products such as:

- Car and bike spare parts
- Engine oil and lubricants
- Helmets
- Car and bike accessories
- Batteries
- Seat covers
- Floor mats
- Car perfumes
- LED lights
- Mobile holders and other accessories

Functions:

- Add new products.
- Update product details.
- Delete discontinued products.
- Search and view product information.

C. Sales and Billing Management

- Record customer purchases.
- Generate bills and invoices.

- Calculate total amount and discounts.
- Maintain sales history.

D. Inventory Management

- Add new stock.
- Update stock quantities.
- Monitor available inventory.
- Display low-stock products.
- Maintain stock movement records.

E. Supplier Management

- Add supplier details.
- Update supplier information.
- Record purchases from suppliers.
- View supplier records.

F. Employee Management

- Add employee records.
- Update employee details.
- View employee information.
- Remove employee records when required.

G. Report Generation

- Generate daily and monthly sales reports.
- Generate inventory reports.
- Generate supplier reports.
- Generate product-wise sales reports.

- **Generate customer purchase reports.**

FUNCTIONAL REQUIREMENTS

Module	Functionalities
Customer management	Registration, Login, profile management, address management
Product catalog	Add/View products, search, filter, product details
Shopping cart	Add/Remove products, update quantity, save for later
Wishlist	Add/Remove wishlist items
Order management	Place orders, cancel orders, return products, generate invoice

Non-Functional Requirements

Performance

- The system should provide fast product search, billing, and report generation.

Security

- Only authorized users should access or modify shop data.

Reliability

- The system should store data accurately and minimize errors.

Scalability

- The system should support future expansion with additional products, suppliers, customers, and employees.

Usability

- The interface should be simple, user-friendly, and easy to navigate.

Features of Speedz

- Wide range of automobile accessories and spare parts.
- Real-time inventory monitoring.
- Fast billing and invoice generation.
- Customer purchase history tracking.
- Supplier and employee management.
- Sales and inventory report generation.
- Secure login for authorized users.

Conclusion

The **Speedz Automobile Accessories and Spare Parts Management System** Provides an efficient solution for managing all daily business activities. It integrates customer management, product management, inventory control, supplier management, employee management, sales, billing, and report generation into a single system. The system improves productivity, reduces paperwork, ensures accurate record maintenance, and supports better business decisions. This Requirement Analysis Document serves as the foundation for the design and development of the **Speedz Automobile Accessories and Spare Parts Management System**.
